Bore Crews at Green Branch, Arboretum and Estates Drive
➔ Dec 2020 – May 2021

Pipe and Service Line Crews/Restoration
➔ Jan 2021 – Feb 2022

SEWER PROJECT PHASE 2

2021

Project start date November of 2020
Project completion date February of 2022

The project begins beyond the Heather Run subdivision towards the lake and ends near the family Center located at 1100 Estates Dr.

The project remains mostly in the rear of properties until it intersects the Arboretum located at 9001 Bosque, from here it will cross the grounds of the Arboretum and then under Estates Dr. until it finishes up in the parking lot of the Family Center.

Current estimates have the grounds of White Hall and the gazebo area located at the Arboretum closed from early March until the end of summer with many of the gardens located throughout the property still open to the public.
